

Specs:

Triethylene Glycol Monobutyl Ether (BTG)

CAS: 143-22-6

English Name: Triethylene glycol monobutyl ether (BTG)

TDS:

Item	Triethylene Glycol Monobutyl Ether
CAS	/
Chemical Formula	
Appearance	Colorless to Light Yellow Liquid
Purity %(GC) $\geq$	97%
Initial Boiling Point (760mmHg° C)	$\geq 250^{\circ}\text{C}$
Water content $\leq$ %(KF)	0.1
Acidity (AS HAC) $\leq$ %	/
Specific Gravity (d420)	/
Color $\leq$ (Pt-Co)	50
Package and transportation	200KGS/ Drum Common chemical

Application: Mainly used for hydraulic brake fluid diluent, high speed cutting oil components, etc.

Packing: packed in iron drum, 200 kg/barrel.

Storage: store in a cool, ventilated, dry place. According to the general chemical transportation.
